# GoHere App Development Project: Sprint 2 Task Assignments

In Sprint 2 of the GoHere App Development Project, the team focused on further developing the app's capabilities, addressing feedback from Sprint 1, and laying the groundwork for new functionalities. This summary outlines the tasks assigned to each team member during Sprint 2, emphasizing the collaborative effort to enhance the app's features and user experience.

**Ismail:**

- **Primary Task:** Led the frontend development for CCC07, focusing on creating intuitive and accessible interfaces for the app's users.
- **Additional Responsibility:** Managed project tasks and priorities using Jira, ensuring a smooth workflow and effective issue tracking throughout the sprint.

**Mark:**

- **Primary Task:** Worked on enhancing the Home page and supporting CCC05 development and streamlining navigation to improve overall app usability.
- **Secondary Task:** Collaborated with the team to integrate the Home page's design, ensuring a responsive and user-friendly interface.

**Yibai Wang:**

- **Primary Task:** Took on the role of lead tester, focusing on setting up testing environments, creating test cases, and ensuring comprehensive coverage for all new and existing features developed during the sprint.
- **Collaboration Role:** Worked closely with both frontend and backend developers to identify, document, and address any issues found during testing.

**Jason:**

- **Primary Task:** Focused on backend development for CCC07, ensuring robust solutions to support the app's vast users.
- **Secondary Task:** Addressed continuous integration fixes, enhancing the development pipeline's efficiency and reliability.

**Liang Ma:**

- **Primary Task:** Led the design and prototyping efforts for CCC05 and CCC03, providing high-fidelity prototypes to guide the development team.
- **Support Role:** Offered design support across the project, ensuring a cohesive and engaging user experience across all app components.

**Jun Kai:**

- He was responsible for developing the backend and frontend  services to support CCC06.

**Ankhjargal:**

- **Primary Task:** Focused on developing and testing CCC03, ensuring that the feature met the project's standards for functionality, usability, and reliability.
- **Responsibility:** Coordinated closely with Yibai Wang to ensure testing strategies were comprehensive and effective.

## Goals for Sprint 2:

- **Enhancement and Feedback Integration:** The sprint aimed at enhancing the Home page and developing new features (CCC05, CCC07,CCC06,CCC03).

## Conclusion:

Sprint 2 was characterized by focused development and enhancement efforts through collaborative design, development, and testing, the team made significant progress in expanding the functionalities.
